

OPERATING INSTRUCTIONS

To select TV first press the CD/TV button on the bottom row, then press the top right button (shown on screen as source) then use the large round rotary button to select TV from the on screen list (should list CD, MP3, TV)

When the “Video in motion” feature is active the Navigation may become slightly inaccurate. To solve this the **DOUBLE PRESS** the **VOLUME** button of the steering wheel controls, the unit will then display the safety message and it will no longer be possible to view TV on the move.

To re-activate repeat the process.

Cars without steering wheel buttons will require an external switch added to the Purple cable of the VWAV3 (CAN) interface harness. When the cable is disconnected via the switch the unit will then display the safety message and it will no longer be possible to view TV on the move. To re-activate re-connect the Purple cable via the switch

VWAV3

AV INPUT & VIDEO IN MOTION
VW / AUDI DVD Based RNS-E
Without TV Tuner

LOCATION & REMOVAL

Installation is made at the front unit for both VWAV3 (CAN) and VWAV3 (VIDEO) interfaces.

The unit is removed using 4 AUDI/VW removal keys.

Removing the unit without the correct keys may cause damage and problems when re-fitting the unit.

INSTALLATION

VWAV3 (VIDEO)

Insert the supplied NAVTV 32 pin **GREY** plug to the **GREY** socket on the Head Unit, see fig 001& 002

Connect your Video lead to the socket on the Interface, see fig 001

Connect your Audio leads to the **RED/WHITE** cable sockets, see fig 001

Connect the **RED** to 12v+ ignition/accessory

Connect the **BLACK** to 12v- Ground

INSTALLATION

VWAV3 (CAN)

Remove the "Quadlock" connector from the unit and plug it into the NAVTV harness, next plug the NAVTV harness into the unit.

Any additional plugs that are inserted into the car's "Quadlock" connector will have to be removed and inserted into the NAVTV "Quadlock" connector as shown in fig 004 below.
